Thank you for downloading this resource!

Follow these simple steps to get started

1. Open the .psd file inside Photoshop (minimum version required: CS4)

2. On the Layers palette locate the smart layer named "Your design here". Double click on layer thumbnail to open the smart object container (.psb file)

3. Inside the .psb file you can find a placeholder design used for demonstration. Hide or delete the placeholder logo, then drag&drop your own logo in place.

4. Save and enjoy!

Displacement mapping is a technique used to warp the logo on cloth folds or other textures. When the Displace dialog pops click "OK" and you'll be asked to choose the displacement map. Navigate to the product folder and load the displacement map file provided for that specific .psd you're editing.
